LOCATION

The Pantheon, Rome

Identified by the published source.

REVIEW STATUS

Known-location teaching photo.
Exact camera position unresolved.

A clue is a starting point.

Compare the details together. Record what agrees, what conflicts, and what the photograph leaves unresolved.

VISIBLE CLUE	WHAT TO COMPARE
01 AGRIPPA lettering	Letter shapes and placement above the columns. A different inscription would count against the candidate.
02 Decorated capitals	The carved details at the tops of the columns. Classical columns alone are not a distinctive match.
03 Facade arrangement	The relationship between the lettering, columns, and stonework. Compare the arrangement, not just the style.

THE LIMIT

The source identifies the building. This frame does not establish the exact camera coordinates or the time the photo was taken.

Before you call it a match

- [ ] Open the original source and compare a wider view.
- [ ] Record both matching details and contradictions.
- [ ] Keep the location claim separate from the camera position.

SOURCE & METHOD

"Front Pantheon.jpg" - SkylinesBuilder, 25 August 2020. Image reproduced at reduced resolution; full frame retained, no added annotations.
